

HATTIE SMART

Use the following information to help find your glove size. This is a guide only as no two hand shapes are the same, and no guide will substitute for actually trying them on. Finger length and palm size can vary substantially from person to person, also what is a comfortable fit for one may not be for another.

Width Guide

Print out this page without scaling in the print dialog box. Align your index finger with the thick black vertical line as shown, making sure the width arrows are approximately flush with the position of the knuckles. This is a general guide only. Use a tape measure if there's one available, wrap it around your hand at the widest point, generally the knuckles. Round the measurement to the nearest half inch. Then use the chart below to find your approximate glove size.

MENS

7 1/2" = SMALL

8" = MEDIUM

8 1/2" = MED. LARGE

9" = LARGE

9 1/2" = X LARGE

LADIES

6 1/2" = SMALL

7" = MEDIUM

7 1/2" = LARGE

8" = X LARGE

Note: 8" X Large Ladies will not fit an 8" Medium Mens. In the hand width it may fit but Ladies will have a slimmer (less thick) hand but longer fingers.

USING A TAPE MEASURE IS MUCH MORE ACCURATE
